Service, Technology, Sustainability & Trust

High-quality products with superior technology and service excellence

Service

We are a customer-centred company. Each and every person at Delta Tecnic is focused on covering the needs of our clients. You, as our client, are the core of all our activities. Our primary goal is to best serve you and thus add value to your operations.

Technology

We provide innovative solutions and incorporate new technologies to meet evolving market needs. This technological leadership enhances our customers' efficiencies.

Sustainability

We are committed to sustainability. We foster sustainable economic growth, environmental balance and social responsibility.

Trust

We strive to gain the trust of our customers by supporting them in a focused and agile way. We believe that honest and transparent partnerships foster efficient solution-finding processes.

DELTA TRADING

COSMETICS

DELTA TRADING

COSMETICS

We are specialised in the exclusive distribution of products with unique properties suitable for use in a wide variety of cosmetic and personal care products presenting totally new opportunities for manufacturing today's cosmetics.

DELTA TRADING

COSMETICS

ECKART

Pearlescent and metallic pigments – classic features which orchestrate beauty, give powders, eyeshadows, nail varnish, haircare products and shower gels a fascinating shimmering effect and a unique tangible dimension, thus presenting totally new opportunities and making themselves indispensable for manufacturing today's cosmetics.

The result is always impressive: excellent cosmetics for shining moments.

DELTA TRADING

COSMETICS

CABOT

Our CAB-O-SIL[®] fumed silica and SpectraAl[®] fumed alumina products have unique properties that are well suited for use in a wide variety of cosmetic and personal care products, including antiperspirants, hair and body care products, cosmetics, fragrances and dental products.

CAB-O-SIL fumed silica is a versatile, efficient additive to achieve various important functions. Its large surface area and high purity can provide unique benefits to cosmetic and personal care formulations.

COSMETICS

ronaldbritton

Ronald Britton is a British company and has been involved with the supply of glitter products to the UK market for over 40 years. In 2010, Ronald Britton Ltd recognised that plastic glitter, due to its size, being 100% plastic and used in single-use applications, could be a contributor to microplastic pollution.

With no credible alternative, Ronald Britton Ltd embarked on a journey to trailblaze the industry and develop an ecologically friendly alternative to plastic glitter, in order to provide manufacturers and consumers with a viable option to move away from traditional plastic glitter. Bioglitter® is the manifestation of this vision and a journey to ultimately offer a range of microplastic free glitters that are independently certified to biodegrade in our precious countryside and waterways.
